

IN THE CLAIMS:

1. to 7 (Canceled)

8. (Original) A compressor having a compressing mechanism incorporated in an enclosed container, wherein a muffler is provided at the discharge part of compressed refrigerant, and a communication path curved in the circumferential direction is provided in the discharge hole of the muffler, a fine pipe is connected to the outside of the communication path, and a collector is coupled to the leading end of the fine pipe.

9. (Original) A compressor having a compressing mechanism incorporated in an enclosed container, wherein a fine pipe inclined at 90° or less in the flowing direction of refrigerant is connected to a discharge pipe for discharging compressed refrigerant, and a collector is coupled to the fine pipe.

10. (Original) A compressor having a compressing mechanism incorporated in an enclosed container, wherein a fine pipe inclined at 90° or less in the flowing direction of refrigerant

R. 1.53(b) Div. of
Serial No. 10/421,826

is connected to a discharge pipe for discharging compressed refrigerant, the fine pipe is connected to the inlet of a collector, a filter is provided in the collector, a bypass pipe is coupled to the other outlet of the collector, and the leading end of the bypass pipe is coupled with the discharge pipe.

11. (Original) A compressor having a compressing mechanism incorporated in an enclosed container, wherein the compressing mechanism includes a rotary shaft for transmitting rotation, and an upper bearing and a lower bearing for supporting the rotary shaft, an oil feed path is provided in the upper bearing and lower bearing for the purpose of lubrication, and a collector inclined at an angle of 90° or less in the flowing direction of lubricating oil and closed at the leading end is provided in the oil feed paths.

12. (Currently Amended) A compressor of claim 8 ~~any one of claims 8 to 11~~, wherein a magnetic piece is disposed in the collector.

R. 1.53(b) Div. of
Serial No. 10/421,826

13. (Currently Amended) A compressor of claim 8 ~~any one of~~
~~claims 8 to 12~~, wherein hydrofluorocarbon is used as
refrigerant, and a refrigerating machine oil compatible with the
refrigerant is used.

14. and 15. (Canceled)
